PROJECTS

1. Personal Portfolio

This is a personal portfolio website that gives all the basic information of me including the projects, skills along with the live demo of every project. This also includes my contact information. This is done by using HTML, CSS, Bootstrap and JavaScript.

2.Rebel Website Replica:

This is a simple replica of the UI of the rebel website home page. This is done by using only HTML and CSS.

3. Simple Calculator

This is a calculator application using HTML, CSS and JavaScript. This has all the basic functionalities of additions, subtractions, multiplications and divisions.

4. News Application

This application is used to fetch and search all the latest news from across the world. This is created using HTML, CSS and JavaScript. It also uses the concepts of asynchronous programming along with the usage of News API to fetch the data.

5. Pokemon Search Application

This application is used to fetch the characteristics of the Pokemon's and display them in an organised manner. It uses asynchronous programming along with fetching the data from Pokemon API.
